

SILVERGUARD

SilverGuard Properties

Our products were developed for the deflection of RFID signals and serve as security for credit cards, health insurance cards, identity cards and other cards with RFID systems. They are made with 99% pure silver and therefore are perfectly suited to be used in clothing.

While other materials, such as nickel, aluminum or copper, have negative health impacts, silver is entirely antibacterial, fungicidal, odor-inhibiting, skin-soothing and antistatic. A layer in a pocket bag is sufficient to achieve complete shielding in all relevant frequency ranges.

ANTIBACTERIAL

SKIN-SOOTHING

FUNGICIDAL

EM SHIELDING

ODOR-INHIBITING

THE BEST ELECTRICAL CONDUCTOR OF ALL PRECIOUS METALS

ANTISTATIC

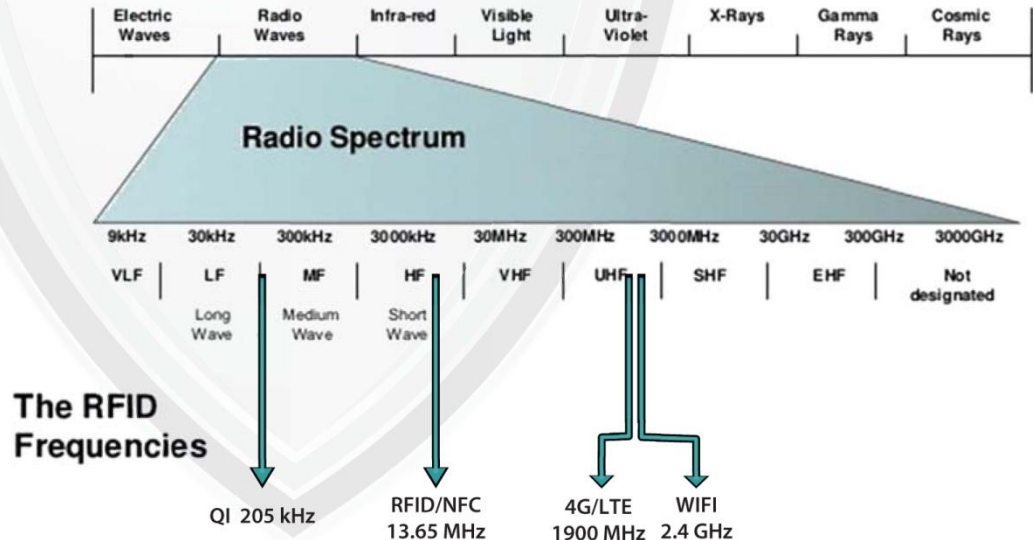

THE BEST THERMAL CONDUCTOR OF ALL METALS

The woven and knitted innovations of  are an excellent solution.

SILVERGUARD

SATURN

34g per square meter

Soft knitted construction

Shielding Effectiveness (db): >49, 450MHz to 5800MHz

JUPITER

The key to his impressive softness is the use
of silver-metallized polyamide yarns

46g per square meter

Smooth Woven structure

Shielding Effectiveness (db):>59, 450MHz to 5800MHz

VENUS

62g per square meter

Soft knitted construction

Shielding Effectiveness (db):>40, 30Mhz to 10Ghz

PLUTO

16g per square meter

Non Woven structure

Shielding Effectiveness (db):>40, 30Mhz to 10Ghz
